## **Election/Restrictions**

- Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-33, drawn to wherein a white balance parameter utilization, classified in class 348, subclass 223.
  - II. Claims 34-70 and 74, drawn to wherein utilization of an image storage or retrieval such as a general purpose computing device, classified in class 382, subclass 305.
  - III. Claims 71-72, drawn to image compression, classified in class 382, subclass 232.
  - IV. Claim 73, drawn to image mapping or transformation, classified in class 382, subclass 276.
- The inventions are distinct, each from the other because of the following reasons:
  - Inventions **I**, **II**, **III** and **IV** are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP §

806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because white balance parameter utilization does not require the particulars of image compression or image transformation or image storage. The subcombination has separate utility such as compressing an image or mapping an image.

- Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III, and IV, restriction for examination purposes as indicated is proper.
- Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

- Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amir Alavi whose telephone number is 703-306-5913. The examiner can normally be reached on Mon-Thu.. 8:00 am thru 6:30pm.
- If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Leo Boudreau can be reached on 703-305-4706. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
